E-SKILL PROJECT

E-Skills For E-Citizens: Effective Access to e-Services

Summary of the project:

The project aims to develop an innovative multilingual Digital Competences Development System fully compatible with the European framework DigComp 2.0 for adult educators

PROJECT RESULTS

O1:Self-assessment and recommendation tool for e-skills (SERT)

O2:An open online course (OOC) about teaching e-skills

E-SKILLS

EFFECTIVE ACCESS TO E-SERVICES

START DATE: 01/11/2021

END DATE: 01/11/2023

E-SKILLS PROJECT

OBJECTIVES

• Provide guidance and resources for adult educators across Europe on training low skilled adults on how to use ICT tools and digital methods to better deliver e government services

• Provide skills to access public services online, which for elders means to keep up-to-date personal competences and transversal skills, leading to a significant step towards active ageing.

• Define/develop a self-assessment tool for digitisation of low skilled adults in order to effectively use e government services

• To train low-skilled adults and develop their competences in digital skills through a gamified web-platform hosting and an interactive online step-by-step web tool to guide them in learning digital skills connected to Open Badges System (OBS) to be tested/complete through two specific training sessions during the project life time.
