E-Skills For E-Citizens:
Effective Access to e-Services

Co-funded by the European Union

Welcome to E Skills project newsletter.

E-Skills aims to develop an innovative Digital Competences Development System for educators working with adults, fully compatible with the European framework DigComp 2.0.

Our partner institutions from Belgium, Turkey, Austria and Slovenia will pave the way for more tailored solutions to overcome digital barriers. Stay tuned for project details!
You can visit our **E-SKILLS** project website !

https://e-skillsproject.eu

E-Skills Objectives

•Provide guidance and resources for adult educators across Europe on training low skilled adults on how to use ICT tools and digital methods to better deliver e government services

•Develop a self-assessment tool for digitisation of low skilled adults in order to effectively use e government services

• To train low-skilled adults and develop their competences in digital skills through a gamified web-platform hosting and an interactive online step-by-step web tool to guide them in learning digital skills connected to Open Badges System (OBS) to be tested/complete through two specific training sessions during the project life time.

Last Activity

In March 2022,UCLL held the kick off meeting. The partners discussed in detail the progress of all tasks.

O1:Self-assessment and recommendation tool for E-skills (SERT)

O2:An open online course (OOC) about teaching E-skills

It was great to meet all together!

Stay tuned for more!
